SMC CHAPTER 20.05

LAND USE APPLICATION

## Project Feasibility Form

The purpose of the feasibility conference is to discuss the general scope of the proposed project prior to the pre-application conference. The feasibility conference may be an informal in-person conversation between the department and the applicant, or this form may be e-mailed to [permittech@sammamish.us](mailto:permittech@sammamish.us). This form serves to document the feasibility conference as proof of its occurrence.

In the project description portion of this form, please include a brief narrative of the proposed project, as well as relevant information about the site such as critical areas, existing structures, utilities, previous projects or land use actions completed on site if known, as well as a site plan of proposed project.
