

Memorandum

Date: September 15, 2016

To: Planning Commission

From: Tawni Dalziel, P.E,
Sr. Stormwater Program Manager

Re: Update of Surface Water Design Manual to meet 2013-2018 NPDES
Stormwater Permit Requirements

Overview

The Public Works Department intends to continue presentation to update the Surface Water Design Manual. On July 7, 2016, we presented an overview of the options to meet the NPDES Permit requirement for the Surface Water Design Manual adoption. The Planning Commission indicated to staff that adopting the *2016 King County Surface Water Design Manual (KCSWDM)* is appropriate to meet Permit requirements. On September 1, 2016, staff presented the draft *2016 Sammamish Addendum* to the *2016 KCSWDM* and amendments to Title 13.

Staff requests that the Public Hearing be opened to allow for public comment on the *2016 King County Surface Water Design Manual (KCSWDM)*, *2016 Sammamish Addendum* to the 2016 KCSWDM, and amendments to Title 13.

Needed Direction

The goal of the September 15, 2016 meeting is to review the *2016 King County Surface Water Design Manual (KCSWDM)*, *2016 Sammamish Addendum* to the 2016 KCSWDM, and amendments to Title 13, open the Public Hearing, and address Planning Commission and Public questions and comments.
