Damage Assessment Advisory

It was reported to us that your home has been recently damaged and will be in need of repair. Along with our sincere condolences for your current situation, we want you to know that the city's building inspection staff is available, at your request, for damage assessment inspections.

A damage assessment report will help to expedite the permit process for repairs and may also be a helpful tool when working with your insurance company. To schedule a damage assessment inspection, please call City Hall at 425-295-0500.

In accordance with the Sammamish municipal code, building permits are required for any work needed to repair damaged structures. This ensures that the work performed by the contractor is done correctly and meets minimum structural and life safety requirements.

As a standard service to its citizens, the city has set up an expedited process that will allow most repair permits to be issued over the counter. In many cases, insurance companies will cover the cost of the permit fees, which pay for the city's processing and inspection expenses.

NOTE: Emergency measures to protect the structure from further damage may be performed prior to permit issuance.

If you have any questions, please contact me at 425-295-0544.

Respectfully,

Kurt Aldworth
Building Official
City of Sammamish
